EDUCATION

UNSW   **Feb 2021 – Nov 2024**

Bachelor of Science (Computer Science)

- **COMP6841 – Extended Security Engineering and Cyber Security**
  - Learned the principles of engineering secure systems, including cryptographic protocols, risk analysis, and intrusion detection, and gained practical experience in identifying and mitigating various security vulnerabilities and exploits through independent study and hands-on activities.
  - **Something Awesome Project**: Developed game hacks for AssaultCube, notably aimbot and no-recoil features with a UI programmed in Python and with CheatEngine743 for the first time.

- **COMP6843 – Web Application Security**
  - Gained expertise in identifying and mitigating web application vulnerabilities, including various SQLi's, XSS, server-side attacks and client-side attacks, grasped best practices in secure coding and testing with DevSecOps, and conducting penetration testing and red teaming exercises to ensure comprehensive security.
  - Ranked **top 15** in the cohort for CTF challenges.
  - Worked in a team to develop two penetration-testing reports on our vulnerable server *quoccabank.com*.

Fort Street High School

High School Diploma

- ATAR: 92.75
